HŪ'MOR, *n.* [L., from *humeo*, to be moist; Sans. *ama*, moist. The pronunciation *yumor* is odiously vulgar.]

1. Moisture; but the word is chiefly used to express the moisture or fluids of animal bodies; as, the *humors* of the eye. But more generally the word is used to express a fluid in its morbid or vitiated state. Hence, in popular speech, we often hear it said, the blood is full of *humors.* But the expression is not technical, nor correct.

Aqueous humor of the eye; a transparent fluid, occupying the space between the crystalline lens and the cornea, both before and behind the pupil.

Crystalline humor or *lens*; a small, transparent, solid body, of a softish consistence, occupying a middle position in the eye, between the aqueous and vitreous humors, and directly behind the pupil. It is of a lenticular form, or with double convex surfaces, and is the principal instrument in refracting the rays of light, so as to form an image on the retina.

Vitreous humor of the eye; a fluid contained in the minute cells of a transparent membrane, occupying the greater part of the cavity of the eye, and all the space between the crystalline and the retina. *Wistar.*

2. A disease of the skin; cutaneous eruptions. *Fielding.*

3. Turn of mind; temper; disposition, or rather a peculiarity of disposition often temporary; so called because the temper of mind has been supposed to depend on the fluids of the body. Hence we say, good *humor*; melancholy *humor*; peevish *humor.* Such *humors*, when temporary, we call *freaks*, *whims*, *caprice.* Thus a person characterized by good nature may have a fit of *ill humor*; and an ill-natured person may have a fit of *good humor.* So we say, it was the *humor* of the man at the time; it was the *humor* of the multitude.

4. That quality of the imagination which gives to ideas a wild or fantastic turn, and tends to excite laughter or mirth by ludicrous images or representations. *Humor* is less poignant and brilliant than *wit*; hence it is always agreeable. 5. Petulance; peevishness; better expressed by *ill humor.*

But this can not be true, for the word is found in the Celtic as well as Gothic dialects, and in the Arabic

ﻳﺪ *hand*, Class Gn, No. 63; at least, this is probably the same word. The Welsh language exhibits the true sense of the word, which is a circle, a complete series. Hence W. *cantrev*, a division of a county, or circuit, a *canton*, a hundred. (See CANTON.) The word signifies a circuit, and the sense of *hundred* is secondary. The *centuria* of the Romans, and the *hundred*, a division of a county in England, might have been merely a *division*, and not an exact *hundred* in number.]

I.

I is the ninth letter, and the third vowel, of the English alphabet. We receive it, through the Latin and Greek, from the Shemitic *jod, je,* or *ye,* in Greek *ιωτα,* whence our English word *jot.* This vowel in French, and in most European languages, has the long, fine sound, which we express by *e* in *me,* or *ee* in *seen, meek.* This sound we retain in some foreign words which are naturalized in our language, as in *machine, intrigue.* But in most English words this long sound is shortened, as in *holiness, pity, gift;* in which words the sound of *i* coincides with that of *y* in *hypocrite,* and at the end of words in unaccented syllables, as in *holy, glory.* It is this short sound of the French and Italian *i* which we hear in the pronunciation of *been,* which we pronounce *bin.* After *l,* this letter has sometimes the liquid sound of *y,* as in *million,* pronounced *milyon.* This sound corresponds with that of the Hebrews, as in *Joseph,* which in Syria is pronounced *Yoseph,* and with the sound of the German *j,* as in *ja, jahr,* that is, *ya, yahr.*

The sound of *i* long, as in *fine, kind, arise,* is diphthongal; it begins with a sound approaching to that of broad *a,* but it is not exactly the same, as the organs are not opened to the same extent, and therefore the sound begins a little above that of *aw.* The sound, if continued, closes with one that nearly approaches to that of *e* long. This sound can be learned only by the ear.

This letter enters into several digraphs, as in *fail, field, seize, feign, vain, friend;* and with *o* in *oil, join, coin,* it helps to form a proper diphthong.

No English word ends with *i;* but when the sound of the letter occurs at the end of a word, it is expressed by *y: alkali, banditti,* and a few other words of foreign origin, are the only exceptions.

As *a numeral,* I signifies *one,* and stands for as many units as it is repeated in times, as II, two, III, three, &c. *When* it stands *before* V or X, it subtracts itself, and the numerals denote one less than the V or the X. Thus IV expresses *four,* one less than V, *five;* IX stands for *nine,* one less than X, *ten.* But when it is placed *after* V or X, it denotes the addition of a unit, or as many units as the letter is repeated in times. Thus VI is *five* and *one,* or *six;* and XI is *ten* and *one,* or *eleven;* VIII stands for *five* and *three,* or *eight,* &c.

Among *the ancient Romans,* IↃ stood for 500; CIↃ, for 1000; IↃↃ, for 5000; CCIↃↃ, for 10,000; IↃↃↃ, for 50,000; and CCCIↃↃↃ, for 100,000.

I, formerly prefixed to some English words, as in *ibuilt,* is a contraction of the Saxon prefix *ge;* and more generally this was written *y.*

I, *pron.* [Sax. *ic;* Goth. and D. *ik;* G. *ich;* Sw. *jag;* Dan. *jeg;* Gr. *εγω;* L. *ego;* Port. *eu;* Sp. *yo;* It. *io;* Fr. *je;* Sans. *agam.* In Armoric *me* is the nominative; so W. *mi,* Fr. *moi,* Hindoo, *me.* Either *ego* is contracted from *mego,* or *I* and *me* are from different roots. It is certain that *me* is contracted from *meg* or *mig.* See ME.]

The pronoun of the first person; the word which expresses one's self, or that by which a speaker or writer denotes himself. It is only the nominative case of the pronoun; in the objective case we use *me. I* am attached to study; study delights *me.*

We often hear, in popular language, the phrase *it is me,* which is now considered to be ungrammatical, for *it is I.* But the phrase may have come down to us from the use of the Welsh *mi,* or from the French use of the phrase *c'est moi.*

In *the plural,* we use *we* and *us,* which appear to be words radically distinct from *I.*

Johnson observes that Shakspeare uses *I* for *ay* or *yes.* In this he is not followed, and the use is incorrect.

1. *Literally*, that which is seen; hence, form, image, model of any thing in the mind; that which is held or comprehended by the understanding or intellectual faculties.

I have used the word *idea*, to express whatever is meant by phantasm, notion, species, or whatever it is which the mind can be employed about in thinking. *Locke.*

Whatever the mind perceives in itself, or is the immediate object of perception, thought, or understanding, that I call an *idea*. *Locke.*

The attention of the understanding to the objects acting on it, by which it becomes sensible of the impressions they make, is called by logicians *perception;* and the notices themselves, as they exist in the mind, as the materials of thinking and knowledge, are distinguished by the name of *ideas.* *Encyc.*, art. *Logic.*

An *idea* is the reflex perception of objects, after the original perception or impression has been felt by the mind. *Encyc.*

In *popular language*, *idea* signifies the same thing as *conception, apprehension, notion.* To have an *idea* of any thing is to conceive it. In *philosophical use*, it does not signify that act of the mind which we call *thought* or *conception*, but some *object* of thought. *Reid.*

According to modern writers on mental philosophy, an *idea* is the object of thought, or the notice which the mind takes of its perceptions.

Darwin uses *idea* for a notion of external things which our organs bring us acquainted with originally; and he defines it, a contraction, motion, or configuration of the fibers which constitute the immediate organ of sense; synonymous with which he sometimes uses *sensual motion*, in contradistinction to *muscular motion.* *Zoön.*

Mitford writes this word *iland*; and in the Bishops' Bible it was always written *iland* or *yland*; but it is probably too late to hope for any general return to the true spelling.

IF, *v. t.* Imperative, contracted from Sax. *gif*, from *gifan*, Goth. *giban*, to give. It introduces a conditional sentence. It is a verb, without a specified nominative. In like manner we use *grant, admit, suppose*. *Regularly*, *if* should be followed, as it was formerly, by the substitute or pronoun *that*, referring to the succeeding sentence or proposition. *If that* John shall arrive in season, I will send him with a message. But *that* is now omitted, and the subsequent sentence, proposition, or affirmation, may be considered as the object of the verb. *Give* John shall arrive; *grant, suppose, admit* that he shall arrive, I will send him with a message. The sense of *if*, or *give*, in this use, is grant, admit, cause to be, let the fact be, let the thing take place. *If*, then, is equivalent to *grant, allow, admit*. Illy is sometimes but erroneously used for *ill.*

ILL, prefixed to participles of the present tense, and denoting evil or wrong, may be considered as a noun governed by the participle, or as making a part of a compound word; as, an *ill-meaning* man, an *ill-designing* man, an *ill-boding* hour; that is, a man meaning ill, an hour boding ill. It is more consonant, however, to the genius of our language, to treat these and similar words as compounds. In some cases, as before the participles of intransitive verbs, *ill* must be considered as a part of the compound, as in *ill-looking.* When used before the perfect participle, *ill* is to be considered as an adverb, or modifying word, or to be treated as a part of the compound; as in *ill-bred*, *ill-governed*, *ill-fated*, *ill-favored*, *ill-formed*, *ill-minded.* In these, and all similar connections, it might be well to unite the two words in a compound by a hyphen. As *ill* may be prefixed to almost any participle, it is needless to attempt to collect a list of such words for insertion.

Il, prefixed to words beginning with *l*, stands for *in*, as used in the Latin language, and usually denotes a negation of the sense of the simple word; as, *illegal*, not legal; or it denotes *to* or *on*, and merely augments or enforces the sense, as in *illuminate.*

Our simple apprehension of corporeal objects, if present, is *sense*; if absent, is *imagination*, [conception.] *Glanville.*

Imagination, in *its proper sense*, signifies a lively conception of objects of sight. It is distinguished from *conception* as a part from a whole. *Reid.*

The business of conception is to present us with an exact transcript of what we have felt or perceived. But we have also a power of modifying our conceptions, by combining the parts of different ones so as to form new wholes of our own creation. I shall employ the word *imagination* to express this power. I apprehend this to be the proper sense of the word, if imagination be the power which gives birth to the productions of the poet and the painter. *Stewart.*

We would define *imagination* to be the will working on the materials of memory; not satisfied with following the order prescribed by nature, or suggested by accident, it selects the parts of different conceptions, or objects of memory, to form a whole, more pleasing, more terrible, or more awful, than has ever been presented in the ordinary course of nature. *Ed. IM-PU-TRES'CI-BLE, *a.* [*in* and L. *putresco*, to putrefy.]

IN, a prefix, [L. *in*,] is used in composition as a particle of negation, like the English *un*, of which it seems to be a dialectical orthography; or it denotes *within*, *into*, or *among*, as in *inbred*, *incase*; or it serves only to augment, or render emphatical, the sense of the word to which it is prefixed, as in *inclose*, *increase.*

In, before *l*, is changed into *il*, as in *illusion*; and before *r* into *ir*, as in *irregular*; and into *im* before a labial, as in *imbitter*, *immaterial*, *impatient.*

IN, *prep.* [L. *in*; Gr. *ἐν*; Goth. *in*; Sax. *in*; Fr. *en*; Sp. *en*; It. *in*; G. *in*, or *ein*; D. *in*; Dan. *ind*; Sw. *in*; W. *yn*; Sans. *antu.*]

In denotes present or inclosed, surrounded by limits; as, *in* a house; *in* a fort; *in* a city. It denotes a state of being mixed; as, sugar *in* tea; or combined, as carbonic acid *in* marble, or latent heat *in* air. It denotes present in any state; as, *in* sickness or health. It denotes present in time; as, *in* that hour or day. The uses of *in*, however, can not, in all cases, be defined by equivalent words, except by explaining the phrase in which it is used; as, *in* deed; *in* fact; *in* essence; *in* quality; *in* reason; *in* courage; *in* spirits, &c. A man *in* spirits or good courage, denotes one who possesses at the time spirits or courage; *in* reason, is equivalent to *with* reason; one *in* ten, denotes one of that number; and we say also one *of* ten, and one *out of* ten.

In the name, is used in phrases of invoking, swearing, declaring, praying, &c. In prayer, it denotes by virtue of, or for the sake of. *In the name of the people*, denotes on their behalf or part; in their stead, or for their sake.

In, in many cases, is equivalent to *on.* This use of the word is frequent in the Scriptures; as, let fowls multiply *in* the earth. This use is more frequent in England than in America. We generally use *on* in all similar phrases, and this is most correct.

In signifies by or through. *In* thee shall all nations be blessed. I am glorified *in* them.

In a hill, properly denotes *under* the surface; but *in a valley*, denotes *on* the surface of the land.

In that, is sometimes equivalent to *because.*

Some things they do *in that* they are men; some things *in that* they are men misled and blinded with error. *Hooker.*

In these and similar phrases, *that* is an antecedent, substitute, or pronoun relating to the subsequent part of the sentence, or the subsequent clause. God commendeth his love toward us, *in that*, while we were yet sinners, Christ died for us. That is, in the facts stated in the latter clause, for which *that* is the substitute. *Rom.* v.

In as much; seeing; seeing that; this being the fact. I will ride for health, *inasmuch* as I am infirm.

In is often used without the noun to which it properly belongs. I care not who is *in*, or who is *out*, that is, *in office*, or *out of office.* Come *in*, that is, into the house or other place. Who has or will come in, that is, *into* office. A vessel has come *in*, that is, into port, or has arrived.

To be or *keep in with*; to be close or near. *Keep* the ship *in with* the land.

Clerks or parsons are *inducted* by a mandate from the bishop to the archdeacon, who usually issues a precept to other clergymen to perform the duty. direct reverse of logical *deduction*. It ascends from the parts to the whole, and forms, from the general analogy of nature, or special presumptions in the case, conclusions which have greater or less degrees of force, and which may be strengthened or weakened by subsequent experience. It relates to actual existences, as in physical science, or the concerns of life. *Deduction* descends from the whole to some included part; its inferences are necessary conclusions according to the laws of thought, being merely the mental recognition of some particular, as included or contained in something general.

4. The inference of some general truth from *all* the particulars embraced under it, as legitimated by the laws of thought, and abstracted from the conditions of any particular matter. 6. The introduction of a clergyman into a benefice, or giving possession of an ecclesiastical living; or the introduction of a person into an office by the usual forms and ceremonies. *Induction* is applied to the introduction of officers, only when certain oaths are to be administered or other formalities are to be observed, which are intended to confer authority or give dignity to the transaction. IT, *pron.* [Sax. *hit*: D. *het*; G. *es*: L. *id.*]

1. A substitute or pronoun of the neuter gender, sometimes called *demonstrative*, and standing for any thing except males and females. "Keep thy heart with all diligence, for out of *it* are the issues of life." *Prov.* iv. Here *it* is the substitute for *heart.*

2. *It* is much used as the nominative case or word to verbs called *impersonal*; as, *it* rains; *it* snows. In this case, there is no determinate thing to which it can be referred.

In other cases, *it* may be referred to *matter*, *affair*, or some other word. Is *it* come to this?

3. Very often, *it* is used to introduce a sentence, preceding a verb as a nominative, but referring to a clause or distinct member of the sentence "*It* is well ascertained that the figure of the earth is an oblate spheroid." What is well ascertained? The answer will show: The figure of the earth is an oblate spheroid; *it* [that] is well ascertained. Here *it* represents the clause of the sentence, "the figure of the earth," &c. If the order of the sentence is inverted, the use of *it* is superseded. The figure of the earth is an oblate spheroid; *that* is well ascertained.

It, like *that*, is often a substitute for a sentence or clause of a sentence.

4. *It* often begins a sentence, when a personal pronoun, or the name of a person, or a masculine noun follows. *It is* I: be not afraid. *It* was Judas who betrayed Christ. When a question is asked, *it* follows the verb; as, who was *it* that betrayed Christ?
